Training opportunities can be made available on a 1:1, Group, or Community Council basis.

If you are working with other groups, agencies or partners in your Community you may identify a need for support and training.

If you have any training requirements please speak to the CCLO in the first basis.

Training and support opportunities will be sent out on an ongoing basis as part of this section of the Handbook. Please consider this as part of your own development as well as the benefits to your Community Council.
