

The Moray Council Outdoor Activity Generic Risk Assessments

5. Dinghy Sailing

Risk to: Leaders/Participants

Hazard	Risk	Control measures
1. Lifting and moving boats	Manual handling injury.	Leaders will be trained within the NGB coaching scheme on correct lifting and handling. Participants will be briefed by leaders and supervised.
2. Access to/egress from water.	Trips slips and falls. Immersion. Group separation by wind tide or current.	Leaders will be trained to NGB standards in group management and control. Leaders will check access and egress points. Leaders will brief groups on safe and appropriate access and egress. Leaders will define a safe staging point or operational area and participants will be briefed to stay at or within it.
3. Water activity	Immersion. Injury from equipment. Entrapment. Collisions. Biological infection. Water level/state.	Leaders will be trained to NGB standards in group management and instructional techniques appropriate to the level of the activity. Leaders will choose a suitable venue taking account of the nature of the activity, the ability level of the group, water and weather conditions and the equipment available. Participants will wear or carry clothing appropriate for the specific activity and venue. Participants will wear a buoyancy aid, which meets the appropriate specifications. Participants will be briefed on hazards specific to the craft and area of water being used and will be instructed in the skills and techniques needed to avoid them/deal with them. A rescue craft adequate for the anticipated conditions and the group size will be on the water, operated by appropriately qualified staff. This rescue craft must meet and carry the correct equipment set by the NGB. Leaders and participants will carry safety and rescue equipment appropriate for the specific activity and venue.
4. Equipment	Unsuitability. Failure. Damaged. Wrongly fitted.	All equipment will meet current specifications and/or accepted standards where applicable and will be suitable for its intended use. Equipment will be regularly maintained, serviced and where required tested to current specifications. Leaders will carry a repair kit suitable for the activity. Leaders will visually check equipment at time of issue. If participants are using their own equipment, leaders will ensure it is suitable for the expected conditions and nature of the activity. Leaders will make a final check of equipment prior to the activity starting ensuring that buoyancy aids are correctly fitted and fastened, boats are properly rigged and fitted out and equipment carried is properly secured.
5. Weather and conditions	Possible increased risk level. Cold. Hypothermia. Wind. Sunburn.	Leaders will obtain information on weather, water levels, and other relevant factors and make an assessment of conditions prior to any activity taking place. Leaders will modify or curtail the activity if prevailing conditions are inappropriate for the group or the planned activity. Leaders will ensure that each participant is appropriately clothed, carries sufficient food and that additional food, clothing and equipment is available to suit the expected conditions and nature of the activity. Leaders will be First Aid trained to the level required by the NGB for the activity.
