**Date:**  
5 September 2008

Dear Mr Penney

**DE Ref Number: 6830**

**Site Name: Myreton Additional Turbines**

I am writing to tell you that the MOD has no concerns with the proposal as set out in your pro-forma dated 15<sup>th</sup> August 2008.

The application is for 2 turbines at 74 metres to blade tip. This has been assessed using the grid references below as submitted in your pro-forma.

Turbine	100km Square Letter	Easting	Northing
1	NJ	50160	56770
2	NJ	49950	56770

The MOD subject matter expert has identified a need for the turbines to be fitted with aviation lighting in the interests of air safety. All turbines should be fitted with a 200 candela omni-directional red light at the highest practicable point.

If the application is altered in any way we must be consulted again as even the slightest change could unacceptably affect us.

If you apply for planning permission you must ensure that the relevant planning authority consults this office to ensure that no concerns have arisen since the date of this letter.

If planning permission is granted you must tell us;

- the date construction starts and ends;
- the maximum height of construction equipment;
- the latitude and longitude of every turbine.

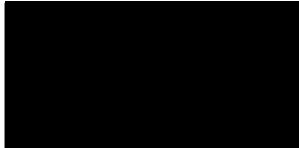

British Quality  
Foundation

**COMMERCIAL IN CONFIDENCE**

This information is vital as it will be plotted on flying charts to make sure that military aircraft avoid this area.

Yours sincerely

Chris Evans  
Assistant Safeguarding Officer – Wind Energy  
Defence Estates
