

HOW OUTWARD BOUND® COURSES SUPPORT YOUNG PEOPLE IN THEIR JOURNEY TO, AND WITHIN, EMPLOYMENT.

Transitioning from education to employment presents a significant challenge for young people today. Employers report weaknesses in young people's employability skills.

In a recent survey of 291 employers, from all sectors of the economy, 61% of the organisations reported that school and college leavers lack the self-management skills/resilience they need to succeed in the workplace; 52% believed that they do not have the required communication skills; and 33% reported that they do

not have the appropriate attitude towards work¹. These findings, coupled with the high level of youth unemployment, indicate that many young people require help in developing the skills and attributes that employers look for when they recruit.

THROUGH PARTICIPATING IN ONE OF OUR COURSES, YOUNG PEOPLE DEVELOP THE SKILLS AND ATTRIBUTES THAT EMPLOYERS LOOK FOR.

We conducted a review of employers' and educational institutions' understanding of the term 'employability skills' in the context of young people. Within the definitions we reviewed, there were some recurring themes. Five **skills** and three **attributes** were highlighted most frequently. Employers look for young people who display strong self-management, problem solving, communication and leadership skills, as well as competence in working with others. They also seek young people who demonstrate a positive attitude, emotional intelligence / capabilities and determination (see Table 1).

In addition to these skills and attributes, **knowledge**, **qualifications** and **experiences** are seen to contribute towards young people's 'employability' (see Table 2³). Our review has enabled us to develop an 'employability framework', onto which we can map the learning outcomes our courses achieve for young people.

We deliver a range of Education courses for young people who attend schools, colleges or youth groups. We also deliver 8 and 19 day courses for individuals aged 15 to 19 years during the summer months. Our evaluation work provides evidence that, through participating in one of our courses, young people develop the skills and attributes that employers look for in potential employees, and that are likely to enable them to perform at a high level within the workplace (see Table 1³).

Although our courses focus on developing young people's skills and attributes, some of the bespoke programmes we deliver also help them to gain the knowledge, qualifications and experiences that contribute to their 'employability' (Table 2 shows the areas for which we have evidence of outcomes).
